

# Hoover Happenings

For the week of 4/29/24

# Mrs. Suder's Third Grade Class!

We have started our new unit, Marine Life, for ELA and the students are very excited to share what they already know!

We are wrapping up unit 5 in math and students are looking forward to getting into learning fractions.

Cursive is coming along great and students are almost done learning all the lowercase letters!

# Mrs. Parmelee's Third Grade Class

Our fairy tales turned out great and we shared the published versions as a class this week. Mrs. Parmelee is making a class book out of them so we can all have the chance to read everyone's stories. Conferences were Thursday. Thanks to all the families who were able to come in! It was great to meet face to face and talk about your wonderful kids.

# Mrs. Houston's Fourth Grade Class

We are busy in science with our circuits unit. We started by answering worksheets and doing activities about the components of a circuit, using an interactive website. Next week we will be constructing our own circuits and testing what happens when we add more batteries and more lightbulbs. To be continued...

# **Ms. Johnson's Fourth Grade Class**

**Our week was ELECTRIFYING!!!!**

**Mr.  
LeMere's**

**Fifth Grade Class**

**Thank you all who attend parent teacher conferences either in person or over the phone. I appreciate meeting with you so we are on the same page and can help our students succeed. It was a fun and learning filled week. We are excited to continue learning about the civil war in unique ways.**

# Mrs. Bienstock's Fifth Grade Class

Heading toward the finish line at full speed ahead! MSTEP is complete save a few make ups. One more round of IReady to shine in showing how we have grown and then BAM! Watch us transform into middle schoolers! We purchased some new games with your generous donations to school store! Thank you to GRAHAM BECKER who learned how to play PLANET with little brother Jack at home and then came and taught us how to play this super fun new board game! We graphed on the grid and we are busy with our final ELA project! Lots going on and we are laughing and giggling our way thru it all!

# Ms. Surratt's Class

Our project this Friday was making moon sand out of oil and flour. Students had a great time working with others to make their own sand any color they wanted.

In addition, we wrapped up autism awareness month with a class conversation and making posters to put around the school about inclusion and Autism to make others more aware and to encourage acceptance and belonging.
