It's March Math Madness! The kids are really enjoying their timed tests - 50 multiplication problems in 5 minutes. We have really seen a lot of improvement. We're also embracing our vivacious vocabulary lessons with our words of the week. Students are doing a great job using them in their writing assignments.

We took a little break from our math workbook to play some math games.

The students had a great time learning a bunch of new math games and practiced their skills in a fun way.
